

Secure Hosted Exchange

Exchange 2013 *plus* advanced email security

Making sure your hosted email is secure, meets compliance guidelines, and is always available is not just optional anymore... it's a necessity. With Exchange + you'll benefit from the added protection of our complete suite of proven & trusted email security services. Our layered security and continuity systems build upon the power of Exchange 2013, giving you a complete hosted email solution.

Exchange 2013

- Up to 50GB inboxes
- Contacts
- Calendars
- Distribution Lists
- Collaboration
- Social Media Apps

The Benefits of Exchange +

CloudFilter™ Security

Using CloudFilter is like having your own personal spam-defense team that works around the clock. Our heuristics engines perform more than 75 tests containing over 500,000 active pattern-matching algorithms.

MS Exchange 2013 Features

With our Hosted Exchange package you get all the features you need to keep your organization safe, connected, & working as a team: synching, sharing, calendars, tasks, notes, & more!

Redundant Infrastructure

Don't stress about your email being down anymore. Exchange + is hosted from multiple Tier IV facilities which feature fully redundant connectivity & power, & employ state-of-the-art security and fire-prevention systems.

Improved Email Deliverability

Clean internal email in the cloud significantly lowers the risk of improper routing and noncompliant messages and strengthens your image of professionalism.

Inbound/Outbound Policy Control

Utilize pre-defined content lexicons to secure data such as Social Security or credit card numbers, or create custom email filtering rules to match your organizational policies or stringent legal compliance needs.

3 Mailbox sizes to choose from

Mix and match your mailboxes depending on the features needed. Exchange + gives you up to 50GB of storage if you need it, but if you don't, you can scale back to our 10GB "Basic" level to save money.

Choose from 3 feature-rich Exchange + packages

You can have both savings AND flexibility with Exchange + packages that you can custom fit to your needs. Some of your users may need more storage than others, or maybe they require Outlook and Email Archiving. But maybe others can get by with a basic filtered Exchange + mailbox. The choice is entirely up to you. Check out the different packages below.
