

Benefits of archiving

Powerful search and fast access

Quickly retrieve emails by searching across a specific date range, use wildcard characters to look for specific words within subject lines, or pull any/all emails from a specific domain (e.g., yourcompany.net)

- ✓ Meet eDiscovery search and retrieval requirements and ensure legal compliance
- ✓ Archive inbound, outbound and internal messages
- ✓ Give end users unalterable access to their personal archive via Microsoft Outlook

Compliance ready solution

Governmental agencies such as the U.S. Securities and Exchange Commission (SEC) and other regulatory entities have established strict requirements for electronic document retention, accessibility, and security.

- ✓ Tamperproof read-only storage
- ✓ Searchable data and metadata
- ✓ Transport and storage encryption
- ✓ Secure archiving communications using TLS or SSL

Alternative data storage

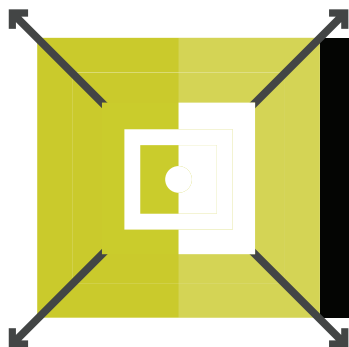

Gain additional storage space without additional costs associated with traditional cloud-based backups.

- ✓ Valuable supplement to existing point-in-time backups
- ✓ Restore individual messages faster than a tape backup
- ✓ No size restrictions

Flexible file handling

Reduce the storage burden on your mail server by keeping your email archive in the cloud. You're free to view, forward, and download messages from your archive in various file formats. How you manage it is up to you.

- ✓ Import pre-existing messages into SecureStore
- ✓ Archived messages can be safely removed from the server to free up space and improve performance
- ✓ Desktop PST files can also be imported, securing customer data in a central repository

Scalability

SecureStore is built on a highly reliable and scalable SaaS platform. SecureStore can be deployed immediately and requires no upfront hardware or software investment.

SecureStore is great for e-discovery as well as routine retrieval of lost or inadvertently deleted email

There are plenty of reasons why you should consider investing in the SecureStore email archiving solution. Here are some of the best ways SecureStore can **benefit your organization**:

Business continuity – not a day goes by where some organization loses all of their email history through a combination of technical failures, fires, and theft. The cost, in terms of organization disruption and efficiency is incalculable. SecureStore is your peace-of-mind.

Regulatory compliance - there's a good chance your organization is required by law to store email for a certain period of time. Laws vary by country, but in the U.S. HIPAA, the USA Patriot Act, SEC Rule 17a-3&4, Sarbanes-Oxley, FRCP, FDA Title 21 CFR Part 11 and the Gramm-Leach-Bliley Act are among the laws that might apply to you. With SecureStore you're covered.

Litigation and legal discovery - Without SecureStore, email likely exists on some combination of backup tapes and on end users' local workstations. If a specific email needs to be found for an internal investigation or in response to litigation, it can take weeks to find and costs a great deal. With SecureStore, email can be searched and found in seconds.

Messaging system & storage optimization - SecureStore improves email server performance and storage efficiency by removing emails and attachments from the messaging server based on administrator-defined policies—by age, source, type, etc. Archived email and attachments remain accessible to your end users through your existing email client applications.

Other uses include - SecureStore is also effective for email backup and disaster recovery, records management (email retention policy), and monitoring of internal and external email content.

Supported platforms

Inbound/Outbound archiving **supports any mail platform**. Plus the addition of internal mail is supported on any platform capable of presenting a secure, journaled IMAP email box (contact support for details). As a hosted solution, SecureStore is independent of your email platform, allowing you to upgrade your email server to a new version or change your backup software without affecting the data in the archive.

Data retention terms

Choose from 3 different archiving terms designed to meet your specific compliance needs. Our SecureStore service provides convenient management and retention of inbound, outbound and internal emails. Do you need SecureStore for up to 5 or 10 years? Simply select the right Archiving package for you and you're ready to go.

All levels of SecureStore include:

- ✓ Free setup
- ✓ No long-term commitment
- ✓ No data limitations on any timed storage plan
